"EDIUS 9 is a significant update to our professional video editing software, providing our customers with a more powerful and flexible editing environment. The new floating license model and enhanced user interface are just two of the many improvements we've made in this release. We're excited to see how our customers will use these new features to create stunning HDR content. EDIUS 9 is available now from Grass Valley. For more information, please visit our website, or contact your local sales representative. EDIUS 9 is the new standard for professional video editing."

EDIUS 9 is the most powerful and feature-rich version of the EDIUS family yet. It introduces a new floating license model, allowing users to run EDIUS 9 on a single PC or across multiple PCs in a network. The new interface is more intuitive and easier to use, with a redesigned workspace and a new menu system. EDIUS 9 also features integrated HDR support, allowing users to capture and edit HDR footage. Other new features include a new multi-camera editing workflow, a new multi-track editing workflow, and a new multi-track editing workflow. For more information, visit www.grassvalley.com
